

**Heil HCl tank vent scrubbers** are designed to meet the requirements of each application. The system pictured includes a packed tower, Heil 730, scrubber, recirculation tank, pump, piping, ductwork, fan and stack all mounted on a common skid for ease of handling and installation. This system utilizes recirculated water as the scrubbing solution and has been field tested to 98%+ HCl removal efficiency.

Other HCl systems utilizing eductor, Heil 770, scrubbers or combinations of Heil 730 and 770 scrubbers are also available to meet specific application needs.

HCl removal efficiencies in excess of 99% are available utilizing water or caustic as the scrubbing solution.

Other Heil scrubbers and systems are available for HCl process ventilation including capture and reclaim of HCl.

Contact Heil for additional information on scrubbers for HCl and a wide variety of other contaminants.
