

# HEIL®

PROCESS EQUIPMENT

**Heil Scrubber, Fan, Duct and Stack** for acid gas and entrained liquid removal. Heil Model 7312X Spl, HCL-54 fan and stack during performance testing. The twelve foot diameter scrubber contains thirteen feet of HeilPac tower packing and a Heilex style entrainment separator. The system is designed to treat 50,000 CFM of air contaminated with a variety of acid gases and bases. The scrubbing solution is recirculated water. Acid gas removal efficiencies in excess of 99% are available utilizing water or caustic as the scrubbing solution.
